

BlueScan Plus UV/Vis Spectrometer

The **BlueScan Plus UV/Vis Spectrometer** is capable of simultaneously detecting multiple parameters. The utilization of chemometric methods allows for the measurement and comprehensive analysis of a multitude of water properties, contained suspended solids, as well as dissolved substances. To achieve this, the evaluation encompasses the entire absorption spectrum ranging from the UV until the near-infrared range (200-720 nm).

Application Areas

Drinking Water

- Quality control
- Alarm systems

Environmental Monitoring

- River water
- Surface water
- Well & bore hole

Parameters

- Ammonium
- Biochemical oxygen demand (BOD)
- Chemical oxygen demand (COD)
- Total organic carbon (TOC)
- Dissolved organic carbon (DOC)
- Total suspended solids (TSS)
- Nitrate
- Orthophosphate
- SAC 254nm

* Further parameters with application specific calibration

Functions & Features

Integrated Electronics

Automated Cleaning

Calibration Monitoring (SQI)

Expandable with MSH

High Pressure Resistance

Integrated Pressure Sensor

Adjustable Optical Path Length

Integrated Temperature Sensor

Technical data

System	UV/Vis spectrum 200 - 720 nm
Measuring principle	Spectral analysis
Optical measuring path length	1 - 30 mm
Measuring interval	≥ 3 s
Light source	Xenon pulse light
Measuring head	
Material	Stainless steel 1.4404 / Titanium [optional]
Weight	approx. 6 kg
Dimensions	Length 620 mm; Ø 86 mm
IP protection class	IP 68
Pressure range	0 - 10 bar
Operation temperature range	-5 to +45 °C
Art. no.	461 6600

Interfaces

- 1x CAN bus for connection to the BlueBox system
- 1x CAN bus for connection of the **Multi Sensor Head (MSH)** probe head [optional]
- 1x Modbus [RTU] for connection to a PLC or integration into third-party systems

Parameters

UV/Vis detectable Parameters	
Pressure / Level	0 - 10 bar / 0 - 100 m
Temperature	0 - 60 °C

Integrated Pressure Sensor

The BlueScan Plus is equipped with an integrated pressure sensor, which allows to calculate the current water level.

Integrated Electronics

Compared to the ISA UV/Vis spectrometer, the BlueScan Plus features integrated electronics and can be connected directly to the BlueBox system via CAN bus. This allows applications where longer cable lengths are required, such as well monitoring. The BlueScan Plus is also equipped with an internal memory to store the measurement data and calibrations and allowing a stand-alone operation.

Automated Cleaning

The BlueScan Plus is equipped with an automated brush cleaning system to prevent contamination of the optical windows. The low power consumption of the brush makes the BlueScan Plus particularly suited for systems that are powered by batteries or solar panels.

Expandable with MSH

The expandable design of the BlueScan Plus allows the extension of the spectrometer with a **Multi Sensor Head (MSH)**. The MSH is a modular sonde that allows the integration of up to four sensors or electrodes in one submersible probe head. With this feature it is possible to increase the number of measurable parameters even further.
