### FEATURES

SERIES 32 and 432 Pump 3 GPM (.7 m<sup>3</sup>/hr) Size Shown. Packed or Mechanical seal type. Valve on casing.

#### "C", "F" & "J" through FH Sizes "N" Sizes SAFETY RELIEF VALVE ON CASING OR HEAD (Standard Equipment, All Sizes)

The integral safety relief valve on casing or head permits by-passing of liquid from discharge back to suction side of pump. Reverse valve when reversing pump rotation on large pumps. Small pumps with relief valve built with right hand suction as standard. Left hand special.

#### STEAM JACKETED HEAD (On Request)

Jacketed head or plate permits temperature control of the liquid being pumped. Jacketed plate available on "G" through "LL" size pumps. Jacketed head available on "Q" through "N" sizes. Relief valve not available with jacketed head or plate. For complete jacketed pumps, see Section 430.

#### UPRIGHT, OPPOSITE AND RIGHT ANGLE PORTS (Standard Equipment)

"C", "F" and "FH" size pumps furnished with upright port casings: "G" size pump with opposite port casing and "H" through "N" size pumps with right angle port casings. Right hand port determined by location of side port when facing pump from shaft end. Left hand casing furnished only on special order.

#### MECHANICAL SEAL

"G", "H" and "HL" sizes illustrated All General Purpose pumps are available with packed stuffing boxes. Mechanical seals are available on "C" through "HL" size pumps as standard. The seal is a rotary type packaged unit that is simple and selfadjusting. It works WITH rather than against pressure. SERIES 432 Pump 5 GPM (1 m³/hr) Mechanical seal type. Shown with valve on head.

Viking General Purpose Series 32 pumps are extremely well suited for light, medium and intermittent service handling a variety of liquids. The smaller sizes "C", "F" and "FH" are constructed for heavier duty service. Mechanical seal equipped General Purpose pump models in sizes from "C" thru "HL" shown in this section are available with Underwriters label for handling fuel oil. Model numbers for these pumps must be designated by a suffix -X. "UL" listed models can be equipped with integral relief valve. The additional sizes of unmounted General Purpose pumps are illustrated on the following page. Also for continuous service and for handling viscous liquids, see Viking's line of heavy-duty pumps, Section 630.

0 See following pages or consult factory for specific recommendations on individual models or sizes.

One of the second se

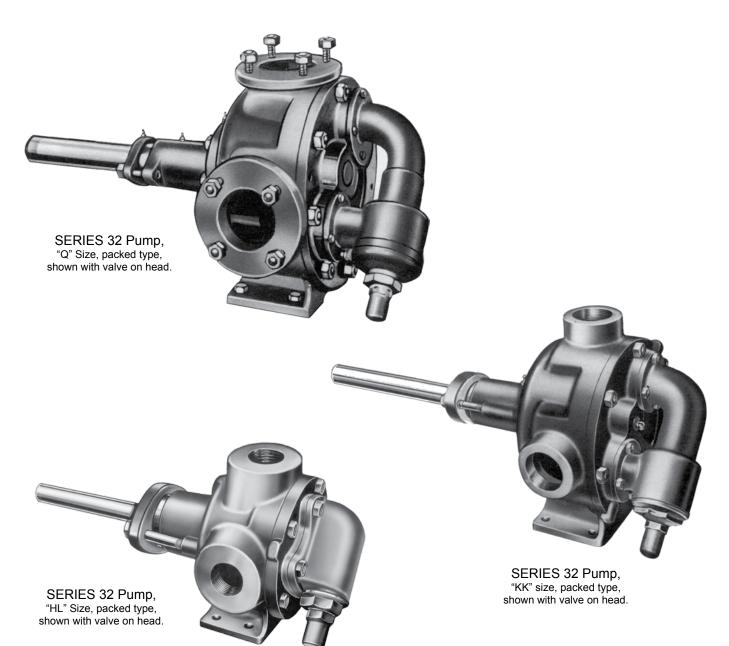

③ 150 PSI (10 BAR) handling fuel oil less than 100 SSU (21 cSt).

Metric conversions are based on US measurements and rounded to the nearest whole number.

**UNMOUNTED PUMPS** 

Viking's unique and unusually simple pump construction makes it adaptable to many diversified installations. The pumps possess excellent vacuum characteristics and will operate and prime at suction lifts up to 25 feet, depending upon the vaporization point of volatile liquids. Because of the cushioned action in providing a continuous and steady stream of liquid without splashing, pounding, foaming or churning, the Viking pump is adaptable to an unlimited number of industrial applications.

All sizes of Viking General Purpose pumps have tapped ports except "LQ", "LL", "Q", "M" and "N" sizes. These have

flanged ports ready to accept companion flanges.

"J" through "N" sizes are furnished with conventional packing as standard. A cartridge style triple lip sealing option is available for the "J" through "N" sizes, contact the factory for details.

A supporting anti-friction bearing pillow block is recommended for the end of the pump shaft on all V-belt driven units.

Dimensions for Unmounted Pumps–See Pages 310.9 thru 310.11.

## DIRECT CONNECTED UNITS ("D" DRIVE)

The direct drive unit incorporating a "C", "F" or "FH" size pump is direct driven from an 1800 RPM motor. All pumps and motors are connected through flexible couplings with guards and mount on formed steel bases.

The direct drive unit in "G," "H" or "HL" size include a pump mounted on a short bracket base with a sealed, radial type ball bearing supported shaft. The bracket mounted pump in turn mounts on a formed steel base and is connected to a 1200 RPM motor through a flexible coupling with guard. This drive arrangement makes a compact, quiet operating unit for all six sizes.

Dimensions for "D" Drive Units-See Pages 310.11 and 310.12.

BRACKET MOUNTED UNIT ("B" DRIVE)

SERIES 32 and 432 Pump with "B" Drive. "G" size pump.

This series of rigid, bracket mounted ("B" drive) units feature a sealed, radial type ball bearing supported shaft, with the pump mounted on a compact formed steel base. The units are built to accept all three size pumps.

V-pulley, coupling or other drive can be mounted on end of pump shaft. "G" size pump furnished with opposite ports only.

These units are especially popular when power is mounted separately from pump. Pumps are exceptionally quiet at reduced speeds and can be furnished with packing or mechanical seal.

Dimensions for "B" Drive Units-See Pages 310.12 and 310.13.

## VIKING HELICAL GEAR REDUCER UNITS ("R" DRIVE)

SERIES 32 and 432 Pumps with "R" DRIVE "A" Reducer. (pump to reducer coupling not illustrated)

The series 32 and 432 in "G", "H" and "HL" sizes are now available with rugged, compact, exceptionally quiet Viking helical gear reducer.

This small "A" size reducer, available in 3 gear ratios (2.76, 3.43 and 4.17 to 1) is ideally suited for these small pumps with bracket mounting.

With the "A" size reducer and 1200 or 1800 RPM motors, the "G", "H" and "HL" pumps can be used to cover a capacity range from  $1\frac{1}{2}$  to 11 GPM.

Dimensions for "R" type drive units-See Page 310.13.

# V-BELT DRIVE UNITS ("V" DRIVE) "C" THROUGH "HL" SIZES

SERIES 32 and 432 Pumps with "V" Drive "G" size pump.

"C", "F" and "FH" size pumps.

"C", "F" and "FH" size V-belt drive units are complete with pump, anti-friction bearing pillow block and guarded V-belt drive. Will mount 1200 or 1800 RPM motor with slotted feet.

"G", "H" and "HL" sizes include pump mounted on short bracket base with a sealed, radial type ball bearing supported shaft. Bracket mounts on formed steel base along with guarded V-belt drive and 1200 or 1800 RPM motor with slotted feet (slide rails used if needed). Maximum standard reduction on all six sizes 4½ to 1, with corresponding decrease in capacity.

Dimensions for "V" Drive Units – See Pages 310.14 and 310.15.

#### SPECIFICATIONS - "V" DRIVE UNITS ("J" THROUGH "N" SIZES)

① Ports are suitable for use with 125# ANSI cast iron or 150# ANSI steel companion flanges or flanged fittings. All others tapped for standard pipe. ② Not available in steel fitted construction.

③ For standard V-belt reductions, see "Viking Drive Speeds" shown on performance curves, which can be electronically generated with the Viking Pump Selector Program, located on www.vikingpump.com/pumpselector.

Metric conversions are based on US measurements and rounded to the nearest whole number.

### DIMENSIONS

These dimensions are average and not for construction purposes. Certified prints on request.

For specifications, see page 310.3.

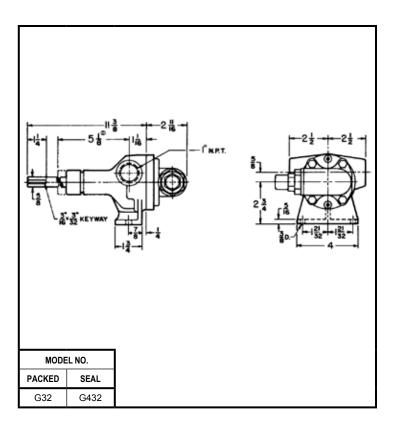

DIMENSIONS– 32 AND 432 SERIES UNMOUNTED PUMPS "C"-"F"-"FH" SIZE

Note: Standard right hand pump pictured. Left hand casing furnished only on special order.

For specifications, see page 310.3.

DIMENSIONS– 32 AND 432 SERIES UNMOUNTED PUMPS "G" SIZE

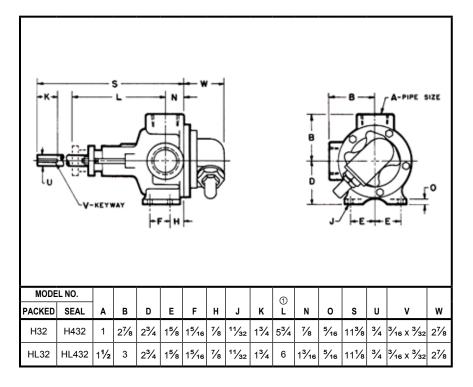

0 Minimum dimension for repacking. Assembled dimension on seal pumps  $3\rlap{/}{} \mbox{fe}".$

### DIMENSIONS

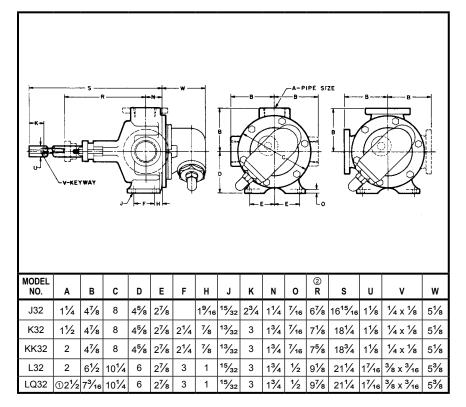

These dimensions are average and not for construction purposes. Certified prints on request.

For specifications, see page 310.3.

DIMENSIONS-32 AND 432 SERIES UNMOUNTED PUMPS "H"-"HL" SIZE

OMinimum dimension for repacking. Assembled dimension on seal pumps: 3<sup>7</sup>/<sub>8</sub>" for Model H432, 4<sup>1</sup>/<sub>2</sub> for Model HI 432

For specifications, see page 310.3.

DIMENSIONS– 32 SERIES UNMOUNTED PUMPS "J"-"LQ" SIZE

 Ports are suitable for use with 125# ANSI cast iron or 150# ANSI steel companion flanges or flanged fittings. All others tapped for standard pipe.
 Minimum dimension for repacking.

### DIMENSIONS

These dimensions are average and not for construction purposes. Certified prints on request.

For specifications, see page 310.3.

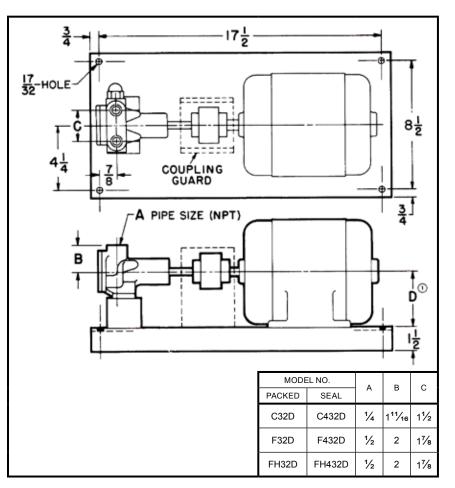

## DIMENSIONS-32 SERIES UNMOUNTED PUMPS "LL"-"N" SIZE

 Ports are suitable for use with 125# ANSI cast iron or 150# ANSI steel companion flanges or flanged fittings.
 Minimum dimension for repacking.

For specifications, see page 310.4.

DIMENSIONS– 32 AND 432 SERIES ("D" DRIVE) "C"-"F"-"FH" SIZE

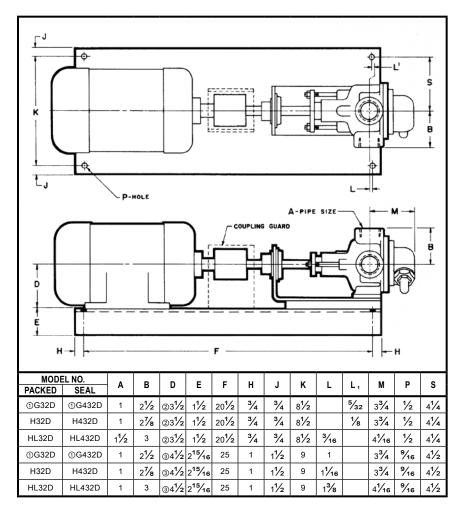

1 Centerheight is 3" with 48 frame motor. Centerheight is 31/2" with 56 frame motor.

### DIMENSIONS

These dimensions are average and not for construction purposes. Certified prints on request.

For specifications, see page 310.4.

DIMENSIONS-32 AND 432 SERIES ("D" DRIVE) "G"-"H"-"HL" SIZE

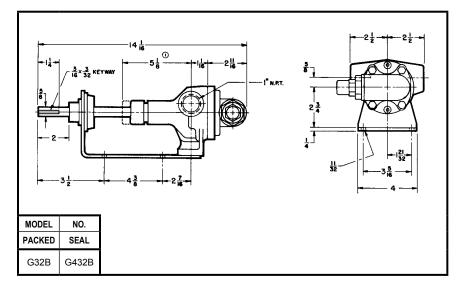

① All "G" pumps are equipped with opposite ports with openings %" above shaft center line. See drawing page 310.9.

<sup>②</sup> For motor frames 56, 143T and 145T.

③ For motor frames 182, 182T, 184 and 184T.

Frame 48 (3" center line), smaller base required.

Frame 213 on up, larger base required.

For specifications, see page 310.5.

DIMENSIONS– 32 AND 432 SERIES ("B" DRIVE) "G" SIZE

0 Minimum dimension for repacking. Assembled dimension for seal pump 31⁄16.

### DIMENSIONS

These dimensions are average and not for construction purposes. Certified prints on request.

For specifications, see page 310.8.

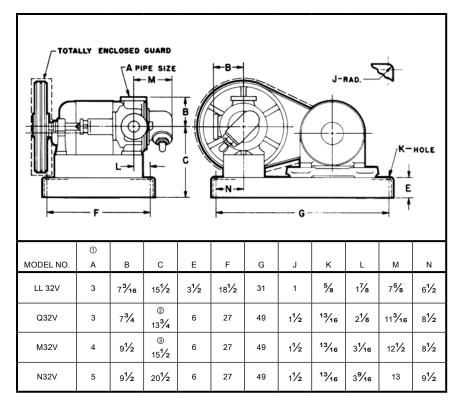

DIMENSIONS-32 SERIES ("V" DRIVE) "J"-"LQ" SIZE

① Ports are suitable for use with 125# ANSI cast iron or 150# ANSI steel companion flanges or flanged fittings. All others tapped for standard pipe.

For specifications, see page 310.8.

DIMENSIONS-32 SERIES ("V" DRIVE) "LL"-"N" SIZE

- ⑦ Ports are suitable for use with 125# ANSI cast iron or 150# ANSI steel companion flanges or flanged fittings.
- ② Dimension "C" (13<sup>3</sup>/4) shown is for 19" or 25" O.D. sheave (lesser reductions). Dimension "C" is 20<sup>1</sup>/<sub>4</sub>" when 33.5"
- O.D. sheave is used (maximum reduction). (a) Dimension "C" ( $15\frac{1}{2}$ ) shown is for 19" or 25" O.D. sheave
- (lesser reductions). Dimension "C" is 22" when 33.5" O.D. sheave is used (maximum reduction)

## **Performance Curve Notes**

Printed performance curves are not available.

Performance curves can be electronically generated with the Viking Pump Selector Program. This program can be located on www.vikingpump.com for the general public.

For authorized distributors, this program can be found listed under the "Products" tab at www.idexconnect.com. Security passwords are required to access IDEXconnect.
