Consultancy

# What's the best equipment for me?

# What's the best equipment for me?

We at AxFlow can help you to find the right pump for the job. We pick the fluid handling equipment best suited for the job from the world's leading manufacturers. And because we do that, you can enjoy the peace of mind that comes from knowing the equipment you use will always be best suited for your process. We will ask questions about what fluid will be pumped, type of application, fluid characteristics, such as temperature, viscosity, capacity and size of pipes etc. With that in our hands we will select the right pump for the job!

## How do we select the product we offer?

Choosing what is the right pump, mixer, grinder, valve, instrumentation etc. is an expert's job - it's our job. We are constantly evaluating our complete offering - to be certain that they still meet our tough criteria.

## Pump Hire

We can offer off-the-shelf pumps ready for hire at a daily rate. Various materials and constructions are available. ATEX compliant, EHEDG certification, CE marked models are available and are fully tested and certified.

Our complete portfolio of services includes:

## Process audit

When you need help to choose the right fluid handling solution we can do a process audit at your site. And with our knowledge and experience we will provide the best solution for you.

## Pump selection service

With our process knowledge and our wide range of pump and fluid handling technologies of different brands you can be sure to have the best solution for your specific need.

- Wide range of pump selection
- Process knowledge

## Pump try-out service

As a step towards your satisfaction we can offer pump try-out service which means that before making a final decision you can try the pump in your process line.

- Wide range of pump selection
- Try out products
