

AxFlow B.V. appointed exclusive distributor for **MODU ONE** in the Benelux

LELYSTAD, THE NETHERLANDS (July, 2025) – MODU Valves A/S and AxFlow B.V. are pleased to announce a strategic partnership under which AxFlow B.V. becomes the exclusive distributor of the MODU ONE modular valve ecosystem in the Benelux region (Belgium, the Netherlands, and Luxembourg). This agreement marks a significant step forward in strengthening presence of MODU ONE in the region and expanding access to its innovative modular valve technology.

The MODU ONE modular valve ecosystem is designed to meet the needs of industries where flexibility, efficiency, and reliability are key—such as food & beverage, pharmaceuticals, chemicals, and other process industries. Through this exclusive cooperation, customers in the Benelux will benefit from a local point of contact with deep technical expertise and a strong service network.

Key Benefits of the Partnership:

Exclusive Representation – AxFlow B.V. will act as the sole distributor of MODU ONE products in the Benelux, ensuring consistent support and streamlined service.

Stronger Market Access – This collaboration enables MODU ONE to expand its reach and serve a wider customer base through the established market presence of AxFlow B.V..

Combined Expertise – By combining MODU ONE's engineering excellence in valves with AxFlow's fluid handling knowledge and application experience, customers will receive best-in-class solutions.

Enhanced Local Support – AxFlow B.V. offers localized technical advice, commissioning support, and after-sales service tailored to the specific needs of customers in the region.

Backwards compatible with large installed base

Between 1999 and 2023, a large number of “Series 88” and “Series 83” 3-piece ball valves were installed across Benelux. Manufactured at the same facility that now produces MODU ONE, these valves built a reputation for reliability and low claim rates.

MODU ONE is the modern evolution of that original design - manufactured in the same factory, and fully backwards compatible with all installations dating back to 1999.

As the official MODU ONE partner, AxFlow B.V. offers:

- Seamless upgrades to MODU ONE equivalents
- On-site identification and technical support
- Expert guidance on replacements, spare parts, and compatibility

If there is uncertainty about the origin or compatibility of installed valves, AxFlow B.V. can assist in identifying the product and recommending the appropriate replacement, spare part or upgrade to MODU ONE.

The partnership is now live

As of today, the partnership between MODU ONE and AxFlow B.V. is operational. Joint market efforts have started. Customers across the Benelux region can now contact AxFlow B.V. for all inquiries related to MODU ONE’s modular valve ecosystem.

About MODU Valves A/S

MODU Valves A/S, based in Vejle, Denmark, is the company behind MODU ONE, redefining industrial flow control through its modular approach. With a focus on high performance, traceability, serviceability, MODU offers a valve ecosystem - MODU ONE - that simplifies installation, maintenance, and operation. MODU also partners with leading industrial companies, providing licensed technology and engineering support to accelerate innovation in flow control. <https://www.modu-one.com/>

About AxFlow B.V.

AxFlow B.V., part of the AxFlow Group, is a trusted supplier of fluid handling equipment, systems, and service solutions. With a strong presence in the Benelux and decades of technical expertise, AxFlow supports a wide range of industries with tailored engineering and after-sales support. <https://www.axflow.com/nl-nl>

This agreement marks the beginning of a promising collaboration between MODU ONE and AxFlow B.V., founded on shared values of innovation, quality, and customer focus. Both companies look forward to a successful partnership and to delivering exceptional value to process industries across the Benelux region.

With Kind regards,
