NOVADOS - A Selection of Metering Pumps Beyond Compare

With NOVADOS metering pumps we offer a wide range for virtually all applications where liquids have to be metered or blended. The product range comprises leak-free diaphragm pumps as well as plunger pumps.

COMMON DESIGN FEATURES

• Modular metering pump gears with built-in low noise worm gear
• Individual stroke length setting utilizing the z-shaped crankshaft
• Range of pump head sizes to allow a flow range of between smallest 0.4 l/h up to largest 20,000 l/h on a single head
• Operating pressure up to 1,000 bar
• Manual or automatic flow rate adjustment

ADVANTAGES

FLEXIBLE

• Optimal capacity adaptation to widely varying production processes
• Variable stroke length for each pump allows independent flow rate adjustment of each pump component
• Variable speed drive allows flow rate variations while maintaining constant proportions

ECONOMICAL

• Automation allows higher production efficiency to be achieved

ADAPTABLE

• Existing installations can be altered or expanded with extra pumps or automatic control
Applications

**Chemical Processing**

**Oil & Gas**

**Power & Energy**

**Pharmaceutical & Biotechnology**

**Textile**

**Water Treatment**

**Personal Care**
WORKING PRINCIPLE OF THE METERING PUMP

Reciprocating pumps are normally comprised of a motor, gearbox and pump head.

The gear reduces the motor speed and converts the rotary motion into a reciprocating movement of a plunger in the pump head.

Flow rate of a reciprocating pump is defined by the plunger diameter, stroke length and stroking speed.

Setting the flow rate of a metering pump can be achieved by changing the speed of the drive motor or - as described below - via an adjustment of the stroke length.

SIMPLY EFFECTIVE: FLOW RATE ADJUSTMENT BY THE Z-SHAPED CRANKSHAFT

Flow rate can be adjusted linearly between zero and maximum by altering the position of the z-shaped crankshaft. This design allows adjustment while the pump is operating or at standstill.

Bran+Luebbe NOVADOS metering pumps exceed the requirements of API 675 in terms of metering accuracy, linearity and reproducibility.
PLUNGER PUMPS

- Low investment costs
- Simple design
- Easy maintenance

DIAPHRAGM PUMPS

A leak-proof pump is the right choice whenever product purity or sterility are imperative or when toxic liquids must be handled.

SPX FLOW Technology offers a wide range of hydraulically actuated double diaphragm pumps.

The design of the pump head ensures that the diaphragm cannot be damaged under critical conditions such as a blocked pipe or closed valves upstream or downstream of the pump.

The freely deflecting diaphragm makes the pump suitable for the metering of slurries.

NOVADOS DIAPHRAGM PUMPS: FEATURES

- Diaphragm position control for maximum operating security
- Operating pressure (PTFE diaphragm) up to 400 bar
- Operating pressure (metallic diaphragm) up to 1000 bar
- Fluid temperature up to 150°C
- Safe dry-run capabilities
- High volumetric efficiency
- High metering accuracy
- Hermetically sealed by two diaphragm layers
- Diaphragm condition monitoring
- NOVALINK CSM 2 Diagnosis interface as standard
- Specific customer requirements on request
DOUBLE-ACTING DIAPHRAGM PUMPS
The double-acting diaphragm pump head offers the benefit of twice the flow rate on a single gearbox whilst maintaining the same metering accuracy.

ADVANTAGES
- Doubled flow rate
- Less foot print required compared with conventional duplex pumps

OPTIONS FOR STROKE LENGTH ADJUSTMENT

MANUAL
- with integrated scale

ELECTRIC
- direct remote control
  - with input signal 0/4...20 mA
- with electronic control card

PNEUMATIC
- direct remote control
  - via input signal (0.2...1 bar respectively 0/4...20 mA)
OPTIONS TO SUIT SPECIAL APPLICATIONS

PUMP HEAD OPTIONS (ON REQUEST)
- Heating or cooling jackets (valve heating possible)
- Quick-release valves
- Remote valves
- Optimised flow channels for slurries or viscous fluids

VALVE DESIGNS
- Ball valves (single, double or triple)
- Cone valves with or without spring
- Plate valves

MATERIALS OF CONSTRUCTION FOR LIQUID-WETTED PARTS OF THE PUMP
- Housings of Stainless steel 1.4571 or 1.4462 alternatively PVC or PVDF
- Diaphragms of PTFE or stainless steel 1.4310
- Plungers of stainless steel, ceramic, tungsten carbide
- Valves of stainless steel, plastic or hard metals
  Special materials available upon request

HORIZONTAL OR VERTICAL COMBINATIONS
SPX FLOW Technology is the only pump manufacturer worldwide to offer both vertical and horizontal combinations of metering pumps.

Possible equipment combinations range from simplex pumps to multiplex pumps with different pump heads, each of them can be controlled independently.
THE PRODUCT RANGE: MORE EXAMPLES OF BRAN+LUEBBE PRODUCTS WITH HIGH QUALITY STANDARD, INNOVATION AND KNOW-HOW.

Metering Pumps for universal applications in the low to medium requirement range
- ProCam
- ProCam Smart
- ProCam Hygienic

Process pumps for large flow rates and high operating pressures
- NOVAPLEX
- MEGANIZER
- High pressure homogenizer

Dynamic in-line mixer for gentle but intensive mixing
- PENTAX
- PENTAX Hygienic

Process systems as a complete solution for increased productivity and quality
- AutoBlind
- Metering and mixing systems

Oil & Gas systems to aid oil & gas recovery onshore and offshore
- Solar Panel Packages
- Chemical Injection Systems
- Flow Control Device Panels

On-line analyzers for use in water and effluent treatment
- PowerMon
- PowerMon S
- PowerMon Compact
