For more than 80 years, SPX FLOW's Bran+Luebbe brand has been providing customers with high quality metering, processing and analysing equipment.

As part of SPX FLOW, we are one of the world's most reputable manufacturers of metering and process pumps, process systems as well as analyzing technologies. Our engineers have comprehensive process and applications knowledge across a wide range of markets. This has resulted in product innovations and developments which harness the latest technology whilst meeting the highest quality standards.

ProCam Metering Pumps

The ProCam modular building block system allows single and multi stream pumps to provide an economical and reliable solution for a wide range of metering applications.

**ProCam Diaphragm/Plunger Pump**
Engineered, single or multi stream pump designed to meet specific application requirements.

*Diaphragm pump*:
- Flow range: up to 3,000 l/h
- Operating Pressure: up to 20 bar*

*Plunger Pump*:
- Flow range: 0.16 to 60.5 l/h
- Operating Pressure: up to 80 bar*

**ProCam Compact Metering Station**
Compact design - ProCam metering pump and metering station allows easy preparation of products to be metered.

- Flow range: 5 to 500 l/h
- Operating Pressure: up to 20 bar*
- Tank size: 60 to 500 l

* for specific types and designs
NOVADOS Metering Pumps

The NOVADOS offers an unparalleled range of metering pumps for an extensive number of liquid metering or blending applications.

NOVADOS Diaphragm / Plunger Pumps

Robust pump with outstanding performance parameters to suit applications using hermetically sealed pump heads to handle hazardous liquids.

Using the same drive design as for diaphragm pumps, the plunger pump head option can be considered for less demanding applications.

Flow range: 400 ml/h to 10,000 l/h
Operating Pressure: up to 1,000 bar* (diaphragm)
up to 500 bar* (plunger)

NOVADOS Pumps with Double-acting Diaphragm Pump Head

Twice the flow of a traditional diaphragm pump head it removes the need for a duplex design, reducing footprint and weight. Equipped with a suction pressure module as special option it is suitable for low energy recirculation processes.

Modular Building Block – Horizontal and Vertical Configuration

Combination of diaphragm or plunger pumps for multi-stream applications with gears and pump heads matching the specifications of the customer.

* for specific types and designs
NOVAPLEX Process Diaphragm Pumps

The Bran+Luebbe NOVAPLEX is a flexible high performance process diaphragm pump handling toxic or aggressive liquids and suspensions at high flow rates and pressure. Typical applications can be found in the chemical, petrochemical as well as oil & gas industries.

**NOVAPLEX VECTOR**
A revolutionary design in the market for diaphragm process pumps! This design has a unique layout that offers a more compact pump.

**Flow range:** 0.1 - 70 m³/h  
**Operating Pressure:** up to 400 bar*

**NOVAPLEX INTEGRAL**
NOVAPLEX Integral diaphragm process pumps are powerful and exact feed pumps in processes where high capacities and/or high operating pressures are required. Equipped with an integrated reduction gear the pumps are very compact with a small foot print.

**Flow range:** up to approx. 60 m³/h  
**Operating Pressure:** up to 1,000 bar*

**NOVAPLEX CLASSIC**
Designed with an external reduction gear this pump allows the incorporation of customer specified gearboxes.

**Flow range:** up to approx. 80 m³/h  
**Operating Pressure:** up to 1,000 bar*

* for specific types and designs
AutoBlend Process Systems

Process units designed for high quality products blended from liquids, pastes and dissolved powders.

**Our core competence:**

- Dilution of chemicals
- Production of personal care products and household detergents
- Systems in paper production
- Continuous dilution of ether sulphate paste
- Systems in water treatment plants
- Production plants for industrial cleaners and cooling agents
- Oil & Gas

**Typical systems**:  

**Chemical Industry**
Preparation and metering of cold-coating agent for glass containers. Specifically pharmaceutical phials need internal coating to meet the quality requirements of scratch-free internal surface.

**Personal care and household detergents**
The production of shampoos, shower gels, heavy and standard liquid detergents, fabric softener, and household detergents require an exact metering and suitable mixing process in order to meet the stringent specifications. Using high quality SPX components the customer can rely on constant quality, low operating cost, reduced maintenance and high availability of the system.

**Water Treatment**
Treating boiler feed water is a major task in power plants (conventional and nuclear) and district heating. We supply customer specified plants for various applications.

**Oil & Gas Industry**
Within the Oil and Gas Industry, the requirements for Chemical Injection Packages are very diverse depending on the application, location, number of chemicals, multi-point injection, increases in production output and changes in production conditions. We supply basic single chemical / single injection point skids to multi-ingredient chemical storage and pumping packages.

* more applications on request
Mixers
Static or dynamic in-line mixers are available for a variety of operations covering a wide range of applications.

PENTAX - Dynamic Mixer
The dynamic in-line PENTAX mixer is designed to meet the demands of industrial markets. An hygienic option is also available. Both designs incorporate the following characteristics:

- High reliability and trouble-free operation due to the robust design
- Stator and rotor mixing system ensures a constant and stable mixing result
- Various options of materials for mechanical seals, gaskets, and drives are available to meet specific process requirements

**Throughput:** up to 50,000l/h*

**Operating Pressure:** up to 10 bar

N-Form - Static Mixer
Simple and robust with no moving parts for trouble-free operation.

- Materials: SS 1.4571 / 1.4581*
- Diameters: DN 15 to DN 65
- Connection: as required
- Heating/cooling: jacketing possible
- The mixing elements can be removed for cleaning and inspection.

Analyzers
With a wide range of process analyzers and an experienced team, Bran+Luebbe is an internationally recognised brand. The latest technology, reliable service and support are offered for the water and waste water treatment industries.

**PowerMon**
The PowerMon is the latest development in the Bran+Luebbe fully automatic on-line process analyzer family. The measuring range reaches from normal concentrations down to traces by using wet-chemical reactions. Fully automatic operation, self-monitoring, and automatic recalibration make them an ideal on-line process analyzer.

- PowerMon Titrometer
  BO₃⁴⁻, hardness, H₂O₂, peracetic acid, acidity (pH-value), S²⁻

- PowerMon Kolorimeter
  Al³⁺, Cl⁻, ClO₄⁻, Cr⁶⁺, Co, CN⁻, Cu²⁺, Fe²⁺/³⁺, Hazen, Mn²⁺, N₂H₄, NH₄⁺, Ni²⁺, NO₂⁻, NO₃⁻, Phenol, PO₄³⁻, TP, S²⁻

- PowerMon Silikometer
  SiO₂

- PowerMon Natriometer
  Na⁺

- PowerMon Ionometer
  CO₂, Cl⁻, K⁺, NH₄⁺, F⁻, NO₃⁻, Mo, PO₄³⁻, TP, S²⁻
SPX FLOW TECHNOLOGY NORDERSTEDT GMBH SERVICES THE FOLLOWING SPX FLOW BRANDS:

- Bran+Luebbe®
- Johnson Pump®
- Lightnin®
- Plenty®
- Waukesha Cherry-Burrell®
